### Capsule

#### Work History

Staked as Herpes cl 1-16 (YA66805) in Aug/81 by the CUB Joint Venture (Brinco Mining Ltd, formerly Cassiar Asbestos Corporation Ltd, Highland Crow Resources Ltd and Union Carbide Canada Ltd), which performed geochem surveys later in the year.

#### Capsule Geology

The claims are underlain by a small Cretaceous granite stock that intrudes Upper Proterozoic to Lower Cambrian phyllites and limestones of the undivided Vampire-Narchilla Formations. The claims were staked on anomalous levels of scheelite in creek gravels. No in situ mineralization was found.
