

Occurrence Details

Occurrence Number: 105D 108
Occurrence Name: Coal Ridge
Occurrence Type: Hard-rock
Status: Anomaly
Date printed: 12/15/2025 1:06:07 PM

General Information

Secondary Commodities: coal
Deposit Type(s): Coal
Location(s): 60°28'59" N - -135°12'33" W
NTS Mapsheet(s): 105D06
Location Comments: .5 Kilometres
Hand Samples Available: No
Last Reviewed:

Capsule

Work History

Old hand trenches are present but the staking details have been lost. This work probably dates from the period 1900-1912. Luscar L examined this target in 1969 while it held the surrounding area as Coal Exploration Licence 4. Restaked as Coal Exploration Licence 301 in Jun/81 by Whitehorse Coal Corp (Echo Developers L), which performed road building and trenching in 1982 and 1983.

Capsule Geology

Patches of coal bloom were noted but the seam was not located. It apparently occurs in the Jurassic-Cretaceous Tantalus Formation.
