

Occurrence Details

Occurrence Number: 105D 124
Occurrence Name: Garbage Dump
Occurrence Type: Hard-rock
Status: Prospect
Date printed: 12/16/2025 2:50:44 AM

General Information

Deposit Type(s): Skarn Cu
Location(s): 60°45'59" N - -135°5'59" W
NTS Mapsheet(s): 105D14
Location Comments: .5 Kilometres
Hand Samples Available: No
Last Reviewed:

Capsule

Work History

Staked as AZ cl (Y24423) in Apr/68 by Lewes River ML, which flew an airborne mag survey later in the year. Optioned in Sep/69 by Canex, which conducted ground mag and IP surveys in 1969 and drilled 3 holes (367.3 m) in 1970.

Capsule Geology

The claims are situated in the overburden covered Yukon River valley and were staked to cover the projected northwest contact of the Whitehorse Stock. The holes were drilled to test a linear IP anomaly. One hole was lost in overburden and the other two cut highly faulted greywacke and carbonaceous, weakly pyritic limestone. Overburden depth ranges from 25 to 75 m.
