

Occurrence Details

Occurrence Number: 105J 001

Occurrence Name: Fuller

Occurrence Type: Hard-rock

Status: Anomaly

Date printed: 6/16/2025 1:09:36 AM

General Information

Deposit Type(s): Unknown

Location(s): 62°58'57" N - -130°11'45" W

NTS Mapsheet(s): 105J16

Location Comments: 1 Kilometres

Hand Samples Available: No

Last Reviewed:

Capsule

Work History

Staked as EX cl (71319) by Cominco in Sep/55, which performed hand trenching. Restaked as Deb cl (Y2579) in Mar/66 by Yukon Copper L, which carried out soil sampling and changed its name to Northern Empire ML.

Capsule Geology

The claims are underlain by Devonian-Mississippian clastic rocks and were probably staked to cover a prominent gossan about one km from the lake. No sulphides were seen and no geochemical response was obtained. The gossan is probably caused by pyrite.
