Work History

Staked as Anne cl (Y9915) in Aug/66 by Glenlyon ML to cover an airborne mag and EM anomaly obtained in a survey flown in May. Glenlyon conducted a ground EM survey in 1967 and optioned the property in 1968 to McIntyre Porcupine ML, which performed EM and soil geochem surveys that year.

Capsule Geology

No outcrop was found on the property but metasedimentary rocks outcrop nearby. Airborne EM anomalies could not be located on the ground, and geochemical surveys returned background values in lead, zinc and copper.
