Work History

First staked in Jul/91 as Fido 1-64 (YB18357) and Spot 1-34 cl (YB19884) by Kennecott Canada Inc. following the release of a government geochemical survey. Kennecott performed a reconnaissance geological and geochemical survey in 1992.

Capsule Geology

The claims are underlain by black shale and chert of the Ordovician to Lower Devonian Road River Group. Silts from streams draining the Spot claims contain anomalous Zn, and soil sampling outlined a northwest-trending Zn and Ba anomaly.
