

## Occurrence Details

**Occurrence Number:** 115G 085  
**Occurrence Name:** Maple  
**Occurrence Type:** Hard-rock  
**Status:** Showing  
**Date printed:** 12/15/2025 1:06:42 PM

## General Information

**Secondary Commodities:** gypsum  
**Deposit Type(s):** Sediment hosted Bedded Gypsum  
**Location(s):** 61°25'6" N - -139°33'55" W  
**NTS Mapsheet(s):** 115G05  
**Location Comments:** .5 Kilometres  
**Hand Samples Available:** Yes  
**Last Reviewed:**

### Capsule

#### Work History

Gypsum was reported from this location by the GSC in 1967. An area 3 km to the west was staked as Mac & Colt cl (YA97427) in Jun/87 by R. Empey, and fringe staked to the north with Don cl (YB8574) in Oct/87 by R. Quesnel. In Jun/88, the Don claims were transferred to Avanti Mls L and then Gold City Res Inc, which prospected and sampled later that year.

#### Capsule Geology

Gypsum occurs along a thrust faulted contact between a Cretaceous diorite intrusion and Upper Triassic Nikolai Greenstone.
