

## Occurrence Details

**Occurrence Number:** 115H 051

**Occurrence Name:** Macintosh

**Occurrence Type:** Hard-rock

**Status:** Anomaly

**Date printed:** 10/4/2025 7:27:02 AM

## General Information

**Aliases:** Jimbo, Mag

**Deposit Type(s):** Vein Au-Quartz

**Location(s):** 61°38'4" N - -136°49'18" W

**NTS Mapsheet(s):** 115H10

**Location Comments:** .5 Kilometres

**Hand Samples Available:** No

**Last Reviewed:**

### Capsule

#### Work History

Staked as Mag cl (YA96050) in Aug/86 by Kerr Addison. Silverquest Res L staked Jimbo cl (YA95699) 3 km to the west in Aug/86. Both claim groups were explored with prospecting and geochem sampling in 1986-87.

#### Capsule Geology

The claims were staked to cover gold silt geochemical anomalies located by a government survey. They are underlain by Triassic hornblende granodiorite. North-trending veins were located but no mineralization was found. The government anomaly could not be duplicated.
