

Occurrence Details

Occurrence Number: 115J 024

Occurrence Name: Toad

Occurrence Type: Hard-rock

Status: Unknown

Date printed: 6/15/2025 7:49:10 AM

General Information

Aliases: Ray

Deposit Type(s): Unknown

Location(s): 62°43'44" N - -138°40'26" W

NTS Mapsheet(s): 115J10

Location Comments: .5 Kilometres

Hand Samples Available: No

Last Reviewed:

Capsule

Work History

Staked as part of 536 Ray cl (97882) in Jan/66 by Nordex EL and explored by geochem later in the year. Restaked as Toad 1-80 cl (Y36528) in Aug/69 by International M Services L for Prado EL and explored by grid soil sampling and mapping in 1970.

Capsule Geology

The Nordex work was directed toward silver-lead vein targets and Prado's work toward porphyry targets. The claims are mainly underlain by Klotassin granodiorite with roof pendants of Paleozoic? metamorphic rocks. Nothing of interest was found by either program.
