

## Occurrence Details

**Occurrence Number:** 115J 040

**Occurrence Name:** Boreal

**Occurrence Type:** Hard-rock

**Status:** Showing

**Date printed:** 6/16/2025 1:17:56 AM

## General Information

**Secondary Commodities:** copper, molybdenum, silver

**Aliases:** Duchess, Princess

**Deposit Type(s):** Porphyry Cu-Mo-Au

**Location(s):** 62°43'33" N - -139°16'44" W

**NTS Mapsheet(s):** 115J11

**Location Comments:** 1 Kilometres

**Hand Samples Available:** No

**Last Reviewed:**

### Capsule

#### Work History

Staked as 310 Duchess and Princess cl (Y46865) in Dec/69 by D. Gosling and associates and optioned to Borealis EL in early 1970. Borealis conducted grid geochem and mapping before dropping the option.

#### Capsule Geology

The property is underlain by Triassic Klotassin granodiorite with a large northwest trending roof pendant of Paleozoic? metamorphic rocks. Several small cappings of Carmacks volcanics were found on the south part of the claims.

Several weakly mineralized quartz veins in the metamorphic rocks returned assays up to 0.05% Cu, 0.002% MoS<sub>2</sub> and 3.4 g/t Ag. No significant geochemical anomalies were located.
