

Occurrence Details

Occurrence Number: 115N 025

Occurrence Name: Milburn

Occurrence Type: Hard-rock

Status: Anomaly

Date printed: 12/16/2025 3:20:20 PM

General Information

Deposit Type(s): Unknown

Location(s): 63°10'0" N - -140°38'55" W

NTS Mapsheet(s): 115N02

Location Comments: 1 Kilometres

Hand Samples Available: No

Last Reviewed:

Capsule

Work History

Staked as Venus cl (Y37478) in Sep/69 by J.B. O'Neill and R. McKamey and restaked as Neen cl (Y99352) in Jul/75 by Great Bear Mg L, which conducted mapping and geochem sampling later in the year.

Capsule Geology

The claims cover a contact between Klotassin granodiorite and Paleozoic? metasedimentary rocks, and an elliptical 250 gamma aeromagnetic anomaly. They were staked because of aeromagnetic and geological similarity to the Sil (Gold Range) property. No mineralization was found.
