#### Work History

Staked as Blue Sky (YB17214) in Jun/88 by Auger Mg, which transferred a 50% interest in Apr/89 to D. Smith. The nearby Sky 1-8 cl (YB45634) were staked by C. Little in Oct/93. Restaked within a large block of Bar claims by Barramundi Gold Ltd in Apr/96. In Mar/99 Barramundi completed 3 850 line km of detailed airborne magnetometer and VLF-EM surveying that covered a 16 x 24 km area centered about King Solomon Dome and included this occurrence.

#### Capsule Geology

The claims are underlain by the Permian Klondike Schist Assemblage. Chlorite schist (unit Psc), is in contact to the southwest with strongly foliated quartz and feldspar augen-bearing quartz muscovite schist (unit Psa, felsic metaporphry).
