

Occurrence Details

Occurrence Number: 116B 009

Occurrence Name: Boyle

Occurrence Type: Hard-rock

Status: Anomaly

Date printed: 6/14/2025 6:11:02 PM

General Information

Deposit Type(s): Unknown

Location(s): 64°3'11" N - -139°11'54" W

NTS Mapsheet(s): 116B03

Location Comments: .5 Kilometres

Hand Samples Available: No

Last Reviewed:

Capsule

Work History

Staked as Golden Lion, etc cl (1084) in May/01 by W. Forster, who put in numerous shallow shafts and trenches in 1901-05. Restaked Dec/90 as Tony 1-128 cl (YB31215) by Rise Resources Inc., and Wealth Resources Ltd, which performed limited soil and rock sampling in 1991.

Capsule Geology

The area is mostly underlain by Nasina Series carbonaceous quartzite and muscovite-quartz schist. Although no ultramafic bodies have been mapped, their presence is strongly suggested by several very strong aeromagnetic anomalies.
No anomalies were obtained on the Tony claims.
