

Occurrence Details

Occurrence Number: 116B 038

Occurrence Name: Fitch

Occurrence Type: Hard-rock

Status: Anomaly

Date printed: 12/17/2025 11:44:57 PM

General Information

Aliases: Abw

Deposit Type(s): Unknown

Location(s): 64°18'51" N - -139°45'33" W

NTS Mapsheet(s): 116B05

Location Comments: .5 Kilometres

Hand Samples Available: No

Last Reviewed:

Capsule

Work History

Staked as ABW cl (Y15172) in Jun/67 by W. Kaufman and B. Fitch following reconnaissance prospecting and soil sampling and optioned to Cons. Skeena ML, which conducted a geochemical survey later in the year. Restaked as FM cl (Y65648) in Sep/72 by Cream Silver ML.

Capsule Geology

Claims are underlain by Paleozoic? metasedimentary rocks in an area that was prospected in the hope that an aeromagnetic low might represent a limestone lens similar to the host rock at the Silver City showing. Anomalous assays obtained by the stakers could not be duplicated, and no mineralization was found.
