

Occurrence Details

Occurrence Number: 116C 027
Occurrence Name: Cone Hill
Occurrence Type: Hard-rock
Status: Unknown
Date printed: 5/31/2025 8:05:55 AM

General Information

Secondary Commodities: gold
Aliases: Blue Jay, Caraboo Mine, Humbug, Star Mine, Teehee
Deposit Type(s): Unknown
Location(s): 64°24'8" N - -140°35'4" W
NTS Mapsheet(s): 116C07
Location Comments: .5 Kilometres
Hand Samples Available: No
Last Reviewed:

Capsule

Work History

First staked about 1895 as Cone Hill Quartz claim by Isabella M. Healy. The claim was surveyed in 1896 and explored with two adits, 9 m and 3 m long. Other early staking includes Caraboo Mine, Star Mine & Humbug cl (707) in Nov/95, Elizabeth and Blue Jay cl (221) in Apr/98 and Paris cl (11682) in Feb/10.
Restaked as Rod cl (87314) in Feb/65 by Cassiar Asbestos Corp L and partially restaked as Teehee cl (YA32726) in Jun/79 by Teslin JV (Cassiar Asbestos Corp L, Cominco L & Exploram Mls L), which restaked as TEFATJV cl (YA64371) in Aug/81 and performed mapping and sampling later in the year.
Restaked as OGIL cl (YB4663) in Dec/87 by Homestake MI Dev C, which performed mapping and geochem sampling in 1988. J. Moreau tied on FMR cl (YBI7296) to the southwest in Jun/88.

Capsule Geology

According to William Ogilvie, a large gold showing was supposed to be present at this location. The adits were driven in unmineralized quartz-carbonate alteration at the contact between a small serpentinite body and limestone and limy argillite of the Nasina Series. Chip sampling of the adit and geochemical sampling showed that gold content is at background levels.

Work History		
Date	Work Type	Comment
12/31/1988	Geology	1:50 000 scale.
12/31/1988	Other	
12/31/1987	Geology	
12/31/1981	Geology	
12/31/1981	Other	
12/31/1896	Other	
12/31/1896	Other	Drove two adits, 9 m and 3 m long.
