

Occurrence Details

Occurrence Number: 116C 163

Occurrence Name: Kink

Occurrence Type: Hard-rock

Status: Prospect

Date printed: 5/31/2025 8:02:57 AM

General Information

Secondary Commodities: gold

Aliases: Kwk

Deposit Type(s): Vein Au-Quartz

Location(s): 64°20'56" N - -140°47'51" W

NTS Mapsheet(s): 116C07

Location Comments: 1 Kilometres

Hand Samples Available: No

Last Reviewed:

Capsule

Work History

Staked as Kink cl (YB23160) in Sep/88 by W. Claxton, who trenched to bedrock in conjunction with placer mining activity in 1988, 1989 and 1990.

Capsule Geology

Trenching exposed six gold-bearing veins across a 100 m width. The veins consist of quartz-siderite lenses up to 0.5 m wide, in gouge and breccia-filled fracture zones up to 4 m wide which cut graphite schist of the Nasina Series (Devono-Mississippian). The fracture zones strike northwest and dip moderately to the northeast.

Work History

Date	Work Type	Comment
12/31/1990	Trenching	done in conjunction with placer mining
12/31/1989	Trenching	done in conjunction with placer mining
12/31/1988	Trenching	done in conjunction with placer mining
