

Occurrence Details

Occurrence Number: 116P 032

Occurrence Name: Norris

Occurrence Type: Hard-rock

Status: Anomaly

Date printed: 6/15/2025 11:41:39 AM

General Information

Secondary Commodities: coal

Deposit Type(s): Coal

Location(s): 67°56'23" N - -136°55'57" W

NTS Mapsheet(s): 116P15

Location Comments: .5 Kilometres

Hand Samples Available: No

Last Reviewed:

Capsule

Work History

First noted by the GSC in 1974 and apparently never staked or investigated. This target lies within a large area withdrawn from staking in Jul/78 pending creation of a National Wilderness Park, settlement of native land claims, and development of a management plan for the Porcupine Caribou Herd.

Capsule Geology

Several seams of anthracite up to 30 cm thick outcrop on the north bank of a small tributary of the Bell River. The coal seams contain about 6% ash and are interbedded with strongly folded sandstone of the Lower Cretaceous Kamik Formation.
